

- ✓ Graduate of the QA training course at the College of Automation
- ✓ High learning ability, and great love for learning new things, a site I've made for example: [My Site](#)
- ✓ Thorough and punctual, disciplined, high motivation and excellent English
- ✓ Certified in practical training in electricity, control and energy on behalf of ORT college – IAI

#### Education and professional courses:

**2021 – 2022: QA and Automation Course** – College of Automation – [www.automation.co.il](http://www.automation.co.il)

As part of the QA course, I acquired knowledge and practical experience in the following subjects:

- ✓ Building test scripts including detailed writing of **STP, STD, STR**
- ✓ Running tests on multiple products and apps on **mobile (Android)** and **browsers (Chrome, Firefox, IE)**
- ✓ Actual experience with the testing processes including **test management in TestRail, bug reporting in Jira, and STR issuance**
- ✓ Understanding and experience working with **CSS, HTML**, including writing my own [Personal Website](#)
- ✓ In-depth understanding of the world of testing, including an in-depth understanding of work processes (**Agile**) and actual experience with the different types of tests (Sanity, End2End, Load, Regression, GUI, Recovery...)
- ✓ Working with **SQL**, excellent knowledge up to the **-Join** level

As part of the automation course, I acquired knowledge and practical experience in the following subjects:

- ✓ Understanding and experience in working with **Java, HTML, CSS, Selenium WebDriver**
- ✓ Building an automation infrastructure from 0 using the Page Object Model

#### Work Experience:

**2021 – 2022: Align Technology – Production department:**

- Production of products and components in a high-tech company as part of a large team – **teamwork**
- Performing tests, searching, and finding faults in an electrical product before it is released to the market

**2021 – 2021: Afcon Electric Transportation – Charging station technician for electric vehicles:**

- Installation of the charging stations as part of a small team and working with the customer – **working in a small team, working with a customer**
- Performing tests on existing charging stations, identifying and fixing faults

**2014 – 2015: IAI – Practical experience:**

- Assistance in the production of UAV systems and UAV's in the factory
- Performing tests on aircraft, identifying and fixing faults

#### Environments and Tools:

- **Tools:** DevTool all browsers (Chrome, Safari, Edge, Firefox), Notepad++, Zoom
- **Operating Systems:** Windows (all), Mobile (Android)
- **Bug Management and testing:** TestRail, Jira
- **Code and programming languages:** SQL, HTML, CSS, Selenium WebDriver, Java
- **Additional methodologies and knowledge:** STP, STD, STR, Agile

#### Military service:

**2017 – 2020: Air Force, First-class technician and UAV instructor, discharged with the rank of staff sergeant**

- **Responsibility** for training stages 9 and 11, the **most advanced and professional stages**
- Responsible for arming and **fixing problems** that arise before takeoff and after landing on operational flights
- **Fixing large-scale problems** within the maintenance screen
- Training new and intermediate soldiers, **responsibility** for their professional level and technical knowledge

Languages: **Hebrew** native      **English** native-level (including technical)      **Russian** native-level
